

NGOZI ANWURI

DATA SCIENTIST | ANALYTICS CONSULTANT

London UK | +44(0)7858589681 | ngozianwuri123@aol.com | [LinkedIn](#) | [Portfolio](#)

Data Analytics and Business Intelligence professional with extensive experience delivering data-driven solutions across analytics, operations, and strategic performance environments. Proven expertise in Tableau, Power BI, SQL, PostgreSQL, and Python to develop scalable reporting frameworks, KPI dashboards, predictive analytics models, and automated data pipelines that improve operational performance and business decision-making.

Experienced in partnering with cross-functional and international stakeholders to translate business requirements into actionable analytics solutions, drive data quality initiatives, and support strategic roadmap delivery. Strong background in benchmarking, performance reporting, data governance, and stakeholder engagement, with the ability to communicate complex insights clearly to both technical and non-technical audiences.

Recognised for a proactive, solutions-focused approach, strong stakeholder management skills, and the ability to lead analytics initiatives end-to-end while fostering data literacy and continuous improvement across organisations.

TECHNICAL SKILLS

- Programming:** SQL, Python (Base, Pandas, Numpy, Matplotlib, Scikit-Learn, Keras), R
- Tools:** Excel, Tableau, Github, AWS (S3, Lambda, IAM, EC2, SageMaker, RDS, DynamoDB, Glue), Docker
- Math:** Linear Algebra, Statistics (Hypothesis Testing, AB Testing, Central Limit Theorem, Distributions)
- Machine Learning:** Linear Regression, Logistic Regression, Decision Trees, Random Forest, KNN, k-means, PCA, Association Rule Learning, Causal Impact Analysis, Neural Networks , GenAI, LLMs, Agentic AI

CORE COMPETENCIES

- | | | |
|-------------------------|-----------------------------------|-----------------------------|
| • Statistical Modeling | • Exploratory Data Analysis (EDA) | • Reporting & Dashboards |
| • Large Language models | • Feature Engineering | • Quality Assurance Testing |
| • Agentic AI | • Data Visualization | • Data Storytelling |
| • Machine Learning | • Model Deployment | • Cross-Functional Teams |
| • Data Mining | • A/B Testing | • Problem-Solving |
| • Predictive Analytics | • Data Wrangling | |

PROFESSIONAL EXPERIENCE

Data Scientist

Amdari Inc. - UK

Nov 2026 – Present

- To combat increasing subscription churn, I built a customer churn model using Logistic Regression in Python. Customers deemed highly likely to leave (75%+ probability) were put onto a retention program leading to a 24% reduction in churn (vs. control group)
- To augment customer data, I applied **predictive modelling (Random Forest in Python, r-squared = 93%)** to estimate missing customer loyalty scores. This led to a 30% increase in customers the business could analyse, and subsequently contact with relevant promotional material
- To enhance content personalization, I applied product association metrics and clustering techniques to create six new customer-driven content categories. These led to an increase in "customer-in-app" time of 5%.
- Developed interactive dashboards in Tableau , Power Bi to visualize KPIs and operational trends, improving executive delivery, helping stakeholders make data-driven decisions, increasing operational efficiency by 30%.

- Implemented scalable workflows in cloud, Jupyter and Google Colab, streamlining model development and deployment while reducing manual effort by 40%.
- Integrated SQL, Python, and cloud platforms to manage large datasets (>300k records), improving accessibility and enabling advanced analytics.
- Conducted A/B testing and cohort analysis in Python, supporting marketing and product strategies that increased engagement and revenue by 10–15%.

Business Intelligence Data Analyst

Digital Echoes

Feb 2025 – Feb 2026

- Designed and implemented forecasting and predictive analytics models to identify forward-looking revenue trends and risk signals, supporting strategic resource allocation and capital optimisation decisions.
- Utilized both **SQL**, **Tableau**, **Powerbi** to automate data extraction, and create a dynamic weekly report that helped senior leadership **understand and investigate trends over time, and diagnose potential issues**.
- Engineered scalable ETL pipelines using SQL and Python to integrate, transform, and structure multi-source datasets for advanced analytics.
- Led a large-scale data quality initiative, cleaning and standardising over 1M records, achieving 95% data accuracy and improving reliability of business insights.
- Monitored model performance and validated outputs to ensure accuracy, consistency, and alignment with business objectives.
- To aid the Marketing team's customer contract strategy, I built an **automated hypothesis testing tool** that analyzed marketing campaign results. This reduced the time for campaign evaluation by 20% and facilitated several other collaborations between Marketing & Data Science in the company.

Analytics & Performance Consultant

Highbury Fields School

Sept 2024 – Jul 2025

- Applied advanced statistical analysis to identify root causes of academic underperformance, implementing targeted intervention strategies that improved key performance metrics by 15% within two academic terms.
- Developed and maintained analytical frameworks and performance dashboards to monitor school KPIs, supporting data-informed decision-making and strategic resource allocation.
- Designed and implemented data tracking systems to monitor student progress, attendance, and attainment trends across cohorts.
- Collaborated with senior leadership to translate complex educational data into actionable insights that informed school improvement plans and policy decisions.
- Presented data-driven reports and performance analyses to executive leadership, supporting evidence-based strategic planning and resource deployment.

Performance Analytics & Improvement Lead

Haberdashers' Knights Academy, UK

Sept 2017 – Jun 2024

Data-Driven Performance Improvement Specialist

Bentley Woods High School, UK

Sept 2008 – June 2017

EDUCATION

MSc Actuarial Science – Cass Business School, City, University of London, UK | 2003 – 2005

BSc Mathematics & Statistics – University of Glasgow, Glasgow, UK | 2000 – 2003

CERTIFICATIONS

Full Stack Data Science - 10Alytics
